

Discover and Explore Science, Technology, Engineering and Math !!

At Engineering For Kids we believe that children are natural born engineers who have unlimited imaginations and unbridled enthusiasm.

Engineering For Kids brings science, technology, engineering and math (STEM), to kids in a fun and challenging way through classes, camps, clubs and parties. We are proud to inspire children to build on their natural curiosity by teaching engineering concepts through hands-on learning.

Upcoming Program at St Maximilian Kolbe School

After School – Environmental Engineering : Go Green (Grades 3 to 5) \$135.00
Mondays (Apr 9, 16, 23, 30, May 7, 14) | 3:00 to 4:15 PM

During the Environmental Engineering classes, students use the Engineering Design Process to design, create, test, and refine basic solutions related to alternative energy and environmental issues. They learn principles behind crafting efficient wind-powered machines and discover how those machines can be used to help reduce the use of fossil fuels. During the culminating project, students test different materials to discover which ones most effectively clean up after an oil spill.
